

7500 Auto Wave Automotive Voltage / Signal Waveform Viewer

Use Auto Wave to quickly and easily verify that signals and voltages are present in waveform format, using a voltage/time scale, without the need for a scope and with more detail than a DVOM.

View signals on ignition primary, fuel injectors, MAF, O2, TPS, crank and cam, PWM components and much more.

• Features & Benefits

- Auto Set Feature — Automatically sets time and voltage scale adjustment for the viewed signal or voltage
- Zoom and Pan — Adjust the view of the signal for a more detailed wave form
- 4 GB Micro SD Card — Save waveform snapshots for later review on the tool or a PC
- Accurate Readings — Sample rate up to one million samples / second
- Color LCD Display — Easy viewing of the waveform time and voltage scale.

Specifications

Voltage Input Range: +/-150V (approx. 170V P/P viewable on LCD)

Voltage Ranges: 150V, 100V, 50V, 20V, 10V, 5V, 2V, 1V

Sample Rate: 1 Ms/Sec @ 100uS/Division

Volt Meter : +/-150V DC

Accuracy: +/-2% FS (per range)

Storage: up to 9999 waves on SD card

Zoom 20x zoom in to 1/20 zoom out (range dependent)

*Please refer to the User Guide for a full list of specifications
