OLD

NEW

Challenge

When installing the wishbones and bushes on the BMW E46 3 series it's recommended to **change the mounting hardware with new components**. In many instances the bolts and washers have a tendency to be corroded so much so that it is necessary to destroy them in order to remove the old components and thus they become non re-usable. The result is the installer has to order and purchase new hardware causing **unnecessary down time to the workshop**.

Easy Solutions

At MOOG we want to Make it Easy. As these accessories are vitally important to have available at time of fitment we now **include all the appropriate mounting hardware** (as pictured) required to install the above BMW parts. Thus avoiding any extra components having to be purchased and **ensuring a trouble free fitment** every time.

**BM-SB-2202, BM-SB-8864, BM-TC-5164, BM-TC-5165, BM-WP-4738, BM-WP-4739,
BM-WP-8861, BM-WP-8862 includes the necessary accessories**
