Norbar is the worlds leading torque specialist. Norbar manufacture an extensive range of high quality torque wrenches to torque values from 1N.m to 2000N.m. They are designed & manufactured to exceed international standards for accuracy. All Norbar Torque Wrenches are offered as standard with a quality ratchet. Norbar torque wrenches are built in Britain & the company strives to offer a high quality, value for money product.

Norbar TruTorque 'TT' Range

In engineering this range, Norbar has paid close attention to accuracy, ease of setting and comfort in use. Accuracy: +/-3% of reading exceeds all international standards for torque wrenches. Each wrench is supplied with a traceable calibration test certificate. Micrometer dual scale for simple and error free setting. Quick and Light adjustment: Adjustment over the entire scale can quickly be achieved and with minimal effort in approximately ten turns. All models feature an adjustment lock to prevent accidental damage of the set torque. The ratchets are reversible and offer a narrow engagement angle of 6 degrees to allow easy positioning in the tight confines of today's vehicles. The handle is both comfortable and durable with a slip resistant soft grip feel. All ratchets are 'push through' which means that the wrenches can provide torque control in both clockwise and anti-clockwise directions.

PART No.	TT200	TT250	TT300

ONLY
£100.00

Norbar Industrial Range

The Industrial range of torque wrenches has a 'break back' action providing an unmistakable signal that can be seen & felt when the set torque is reached. Every wrench is supplied with a calibration certificate to satisfy the requirements of ISO9000. Robust construction gives accurate results, +/-4%, even in arduous working conditions. The break angle improves accuracy by reducing the possibility of over torquing.

PART No.	12009	12009.01
