# BUY NOW & PAY JAN 2017 ON VETECH & BANNER BATTERIES\*

The Vetech Premium Excel range of batteries come with a 3 years warranty and are not budget batteries designed to just hit a price point, rather than do a specific job it is intended and should do!

While some batteries boast being top quality or matching quality, batteries, as with many things there are huge differences between manufacturers. The real proof comes with what the battery delivers and therefore the consumer should concentrate on build quality and the Ah/CCA that the unit delivers rather than price or number of plates.

The reason for this is the OE manufacturers consistently achieve very good performance with fewer plates because their oxide mix is very dense. The budget price driven units often have shorter, thinner and fewer plates than OE producers and therefore gain from economies of scale with plate making, but not performance and longevity. Some manufacturers and suppliers offer hybrid batteries and not the modern calcium-calcium batteries, hybrid batteries are a lot cheaper to produce, however no cars produced after 1999 have been fitted with a hybrid battery and should be avoided at all costs.

## VETECH BATTERIES

**The best batteries with better performance and a longer lifespan.**

Vetech batteries are made by the worlds largest O.E. battery manufacturers, therefore, are naturally better batteries with better performance than the cheaper budget batteries.
