

# VSTD 39

**Course Category:** Diagnostics & Test equipment

**Level:** N/A

**Duration:** 1 day

## Introduction to Pass-Thru (Toyota)

### Course Overview:

This course is designed for workshop technicians who work on Toyota brands with a good understanding of diagnostics, but are limited to aftermarket equipment when coding and programming is required. During the course the trainee will carry out the subscription process, download the Toyota software and configure their KTS as the interface between the vehicle and Toyota (using their own equipment).

### Course Content:

- Introduction to Pass-Thru
- Explain the different subscription types and processes
- Computer set up
- Configure KTS as a Pass-Thru interface (Workshop World)
- Navigation of the Toyota Portal
- Carry out practical exercises.

### Prerequisites:

- Trainees to bring a Windows 10 Laptop and KTS 560/590 or KTS350 loaded with Windows 10
- Trainees to bring a credit card/debit card with them (Subscription Purchase necessary during the course).

### Attainment:

- Trainees will have completed a subscription process using their own laptop.
- Loaded the Toyota software, and configure the KTS interface for Pass-Thru capability.
- Trainees will be able to connect to a vehicle using the KTS as a Pass-Thru device for use with the Toyota portal, and carry out a comprehensive diagnostic routine.
- Trainees will leave the course with a functional solution to Toyota.
