

## FACE SHIELD - LIGHTWEIGHT LIQUID SPRAY BARRIER

Part Number	Quantity	Price
90811000	10 pc	£40
90813000	30 pc	£120
90810000	100 pc	£400

### Summary

Face shield with antimicrobial headband, acts a lightweight barrier to help reduce the risk of Coronavirus infection from liquid spray (such as sneeze or cough) via exposed eyes and facial skin.

### Features

- CE marked and confirms to BS EN 166 & EU 2020/403
- Antimicrobial headband (injection moulded ABS plastic with BioCote® B65633)
- Wrap-around face shield (detachable)
- Fully adjustable elasticated strap (detachable)
- Lightweight (just 30g) and comfortable to wear for extended periods
- High packing density for easy transport, simple assembly in seconds
- Specifically designed for COVID-19 pandemic response
- Made in the UK (in-house, no supply chain)

### Safety

- No foam – reducing contamination risk and aiding sanitisation
- No adhesive – materials won't fall apart if washed or wet
- Enclosed head band improves overhead droplet protection by not having open gap at forehead
- Antimicrobial head band with BioCote® Antiviral Technology – the part in contact with the face and skin is made with non-leaching antimicrobial additives to offer lasting Antibacterial, Antifungal and Antiviral protection
- Snap off strap tag allows contaminated face shields to be easily rendered unusable prior to disposal, helping to communicate condition and preventing accidental or misguided re-use

### Specifications

<b>Weight</b>	30g
<b>Shield</b>	297mm x 210mm
<b>Headband</b>	<b>Antimicrobial injection moulded ABS plastic</b> Provides form & rigidity Produced with BioCote® B65633 Colour: Black (standard, no cost option) Optional Colours: Blue, Pink, Orange, Red, Green and other RAL colours by special order and MOQ.

### Use Cases

- Cleared for use within ICU wards by East Suffolk & North Essex NHS Foundation Trust
- Preferred face shield design for Hertfordshire Ambulance Service
- Currently in use by wards and other front-line services across the UK
- Optional brightly coloured 'friendly' headbands may be preferable when interacting with children

### Antimicrobial Technology

BioCote® Antiviral Technology makes the head band effective against viruses. It is perfect for use in hygiene conscious environments such as hospitals, schools and care homes. BioCote® is non-leaching, does not wear away and is used within a range of products already in use within the NHS. The Antibacterial Technology is based on globally trusted Silver Ion Additives. Once manufactured into a surface, BioCote® Antibacterial Technology will offer lasting protection from bacteria, including superbugs such as MRSA and E.coli.
